

Notice of upcoming aerial survey works

Parks Victoria will soon be undertaking an in-depth aerial survey using a combination of drone and plane flyovers to map Mount Arapiles-Tooan State Park.

Between February 16-20, drones will be used in Mount Arapiles-Tooan State Park to create detailed digital maps and 3D models of the park.

These surveys will be used for precinct planing, facility upgrades, improved signage and education.

Please follow the directions of on-site staff so this work can be carried out quickly and safely.
