

Working to reinstate access

Thank you for your patience and understanding while we work to fully reopen Greenvale Reservoir Park after significant upgrades to Greenvale Reservoir.

We're connecting the northern and southern sections of Greenvale Reservoir Park, opening up over 37 hectares of green open space for the community to enjoy.

Melbourne Water in partnership with Parks Victoria are working to deliver this commitment. We've been undertaking basic work to make the area safe for the public, while also protecting Melbourne's water supply.

We're also making the necessary improvements to reopen the park for public use, which includes new entry points for pedestrians and vehicles, upgraded walking trails, toilets, barbeques, and critical vegetation clean-up and tree safety works.
