

# Weedy Seadragon Master of Disguise

## Habitat

Weedy Seadragons live in the coastal waters of Victoria. You can find them floating slowly through our oceans like seaweed.

## Shelter

Weedy Seadragons find shelter in seaweed, seagrass and rocky reefs. They can't grab onto seaweed with their tails like seahorses can.

## Food

Tiny shrimp and sea-lice are Weedy Seadragons' favourite food. They drift towards the tiny animals and slurp them up with their snout.

## Protection

We can all look after Weedy Seadragons' homes. Rubbish and litter don't belong in a healthy ocean, so make sure your rubbish goes in the bin.

## Care

Rangers and friends look after special places in our oceans called marine parks. These places protect Weedy Seadragons.

## Features

### Weedy Seadragons:

- Look like they're wearing a seaweed costume to blend in
- Use their long snout like a straw
- Steer underwater using little fins
- Can grow as long as this poster!
- Let the dads carry the eggs
- Are cousins of seahorses
- Are a Victorian State Emblem
