

RYE PIER UPGRADES

We're rebuilding a section of Rye Pier making it better and safer for the future

What we're doing

- Reconstructing the first 270m of the pier from the foreshore to before the low landing ensuring a longer pier life.
- Raising the rebuilt section by 600mm to cater for future sea level rise.
- Widening the new timber deck to 4.2m for better pedestrian access.
- Installing steel railings on both sides of the new section for improved safety.
- Installing solar public lights for greater efficiency and safety.

When we're doing it

Works start: February 2022

Works completed: Winter 2022

A complete pier closure is necessary for about six months for public safety.

How we're doing it

Victorian Government \$24 million Piers and Jetties Economic Stimulus package.
