

Gippsland Lakes Coastal Park

Visitor Guide

The Gippsland Lakes Coastal Park is a narrow coastal reserve covering 17,600 hectares along a portion of the Ninety Mile Beach, from Seaspray to Lakes Entrance. This unique and picturesque park consists of lakes, wetlands, marine and terrestrial environments and offers visitors a wide range of recreational opportunities. The park also includes the internationally significant Lake Reeve and Bunga Arm, several islands and the Boole Poole Peninsula.

Welcome to Country

The Gunaikurnai people are the Traditional Owners of the Country featured in this visitor guide.

Through a new way of managing public land called Joint Management, the State has created an equal partnership with the Gunaikurnai people. The benefits of this partnership are many and include: the knowledge and culture of traditional owners incorporated into natural resources (land) management, cultural awareness and knowledge of local history, improved park management through knowledge-sharing and increased opportunities for new initiatives.

By conserving and protecting the natural environment and cultural values, the education and enjoyment experience is enhanced for all community members and visitors.

Gippsland Lakes National Park is one of the jointly managed parks within Gippsland. This agreement recognises the fact that the Gunaikurnai people have always been connected to their land and are the rightful people who speak for that Country. These parks and reserves are cultural landscapes which are part of our living culture.
