

**Port Management (Local Ports) Regulations 2015**

***Port Management Act 1995 (Vic.)***

**Setting aside areas in the Local Port of Port Phillip**

The Port Management (Local Ports) Regulations 2015 have been formed under Section 98 of the *Port Management Act 1995 (Vic.)*.

The Port Management (Local Ports) Regulations 2015, regulation 10 and 12, enable a Port Manager of a local port to make a determination to set aside an area where access and berthing can be permitted, restricted, or prohibited. Regulation 14 provides that the Port Manager may specify certain conditions for the use of the areas under each determination.

Under Section 44C of the *Port Management Act 1995 (Vic.)*, the Board of Parks Victoria has delegated this power to Regional Directors of Parks Victoria, in an instrument of delegation dated 24 November 2020.

I, Jo Richards, Regional Director Marine and Maritime, Parks Victoria, determine under the Port Management (Local Ports) Regulations 2015 that the areas indicated in the attached table and maps are set aside for the purposes specified or for the prohibition or restriction of activity or access, at the times or periods, and in accordance with the conditions, as indicated.

This determination replaces all previous set-aside determinations of specified activities and access and is in force until amended or revoked.

This determination applies from the date of signing.

**Signed at Knoxfield**
